

Yozdzhane Asanov

Senior PHP & Full-Stack Software Engineer

Software engineer with nearly 10 years of professional experience building and maintaining web applications. Experienced in PHP, Laravel, relational databases, legacy-system maintenance and modernization, performance optimization, API integrations, and integrate AI where it adds real value. Focused on delivering reliable solutions, improving existing systems, and collaborating effectively with development teams.

Professional Experience

Senior PHP & Full-Stack Software Engineer · [BestReviews Ltd.](#), Sofia

MARCH 2024 – PRESENT

Maintained the entire ecosystem of the **BestReviews**.

- Modernized a large legacy application by migrating it to newer PHP and Laravel versions, supporting millions of pages.
- Optimized large MySQL databases containing millions of records and improved application performance across data-intensive processes.
- Developed and maintained Apify web scrapers and integrated third-party APIs and AI services.
- Worked with Docker containers and Laravel Horizon to monitor background jobs, investigate issues, and maintain reliable processing.
- Proposed and implemented technical solutions to address business requirements and improve system efficiency.
- Used technologies: PHP OOP, Laravel, MySQL, JavaScript, jQuery, CSS, Jira, etc.
